So ive looked around quite a bit and havent found anything perfect yet. I did find a shop who might give samples:

belt clip A9152048

increase height by 5mm A9153219

Other stuff of interest below. Also I swear to god I bought that m4 from frys for us, which is how I found out about serpac. I have emailed daniel to ask if he knows where it is because I havent seen it recently. We should probably wander to frys again too! Im thinking with the samples (if they go through) and a trip to frys well find -something- and we dont need to worry about having it go through on tonights order.

Thoughts?
